

نتائج الاختبارات :

الاختبار بـ 4 نیاسب و طول 20000

ADD Synchronization execution task: 1265 ms

List length after add: 17676

Contain Synchronization execution task: 2928 ms

Total number of successes found: 4397, failures found: 15603

Remove Synchronization execution task: 2633 ms

List length after remove: 13906

Total number of successes removed: 3770, failures removed: 16230

=====

ADD RWLock execution task: 3607 ms

List length after add: 17676

Contain RWLock execution task: 673 ms

Total number of successes found: 4397, failures found: 15603

Remove RWLock execution task: 2198 ms

List length after remove: 13906

Total number of successes removed: 3770, failures removed: 16230

=====

ADD Lock execution task: 4073 ms

List length after add: 17676

Contain Lock execution task: 7817 ms

Total number of successes found: 4397, failures found: 15603

Remove Lock execution task: 6971 ms

List length after remove: 13906

Total number of successes removed: 3770, failures removed: 16230

=====

=====

الاختبار بـ 4 نیاسب و طول 50000

ADD Synchronization execution task: 7399 ms
List length after add: 37255

Contain Synchronization execution task: 24842 ms
Total number of successes found: 23420, failures found: 26580

Remove Synchronization execution task: 16293 ms
List length after remove: 19979

Total number of successes removed: 17276, failures removed: 32724

=====

ADD RWLock execution task: 17140 ms
List length after add: 37255

Contain RWLock execution task: 6026 ms
Total number of successes found: 23420, failures found: 26580

Remove RWLock execution task: 26297 ms
List length after remove: 19979

Total number of successes removed: 17276, failures removed: 32724

=====

ADD Lock execution task: 11556 ms
List length after add: 37255

Contain Lock execution task: 23415 ms
Total number of successes found: 23420, failures found: 26580

Remove Lock execution task: 18819 ms
List length after remove: 19979

Total number of successes removed: 17276, failures removed: 32724

=====

الاختبار بـ 4 نیاسب و طول 100000

ADD Synchronization execution task: 33023 ms
List length after add: 57018

Contain Synchronization execution task: 102824 ms

Total number of successes found: 71172, failures found: 28828

Remove Synchronization execution task: 19254 ms

List length after remove: 16326

Total number of successes removed: 40692, failures removed: 59308

=====

ADD RWLock execution task: 67265 ms

List length after add: 57018

Contain RWLock execution task: 19697 ms

Total number of successes found: 71172, failures found: 28828

Remove RWLock execution task: 64654 ms

List length after remove: 16326

Total number of successes removed: 40692, failures removed: 59308

=====

ADD Lock execution task: 54709 ms

List length after add: 57018

Contain Lock execution task: 112906 ms

Total number of successes found: 71172, failures found: 28828

Remove Lock execution task: 63605 ms

List length after remove: 16326

Total number of successes removed: 40692, failures removed: 59308

تحليل النتائج :

العملية	الأفضل	الأسوأ	السبب
البحث (Contain)	RWLock	Synchronized	قراءات متوازية vs قفل كامل
الإضافة (Add)	Synchronized	RWLock	نفقات RWLock الإضافية
الحذف (Remove)	RWLock	Lock	تحسينات إدارة القفل

ترتيب الأداء النهائي:

-1 عمليات البحث: (Contain)

RWLock → Synchronized → Lock

-2 عمليات الإضافة: (Add)

Synchronized → Lock → RWLock

-3 عمليات الحذف: (Remove)

RWLock → Synchronized → Lock

تحسين الأداء:

1. للقوائم كثيرة القراءة: استخدم RWLock دائمًا

2. للقوائم كثيرة الكتابة Synchronized: قد يكون أفضل

3. للتطبيقات المختلطة RWWLock: يقدم أفضل توازن

تفسير اعداد الفشل والنجاحات:

Successes: 4,397 | Failures: 15,603

السبب :

نطاق الأرقام : 80000

عدد المحاولات: 20000

معظم محاولات الفشل الإضافية تمنع التكرار .
